INSTITUTE OF INDUSTRIAL & SYSTEMS ENGINEERS

Institute Of Industrial & Systems Engineers
South Jersey – Delaware Valley Chapter No. 132

VOLUME 61 | October 2022 | NUMBER 8

IISE-SJDVC132 Website: http://www.iisesjdvpc.org

Theme: Quality

We will be holding a joint meeting with ASQ in October, focusing on process implementation

---

Date: Tue, Oct 11th
Time: 6pm – 8pm
Location:
Adelphia Restaurant
1750 Clements Bridge Rd,
Deptford, NJ 08096

Abstract: As a Quality professional, most of the processes that we work with are well-defined by SOPs or other instructional documentation. The process descriptions define the system elements that need to be addressed (tasks to be performed, data to be recorded, etc.). However, when it comes time to implement a process or a process change, other people have to do it. Very few systems changes are actually performed by Quality personnel; they are done by rank-and-file employees. So, how do we get other people to implement improvements that they did not initiate? In this presentation, we will look at some of the common Quality processes and how we can enlist others to help make our improvements effective.

Chapter members are invited to set up a site tour of their employer's facility for the chapter's membership, in exchange for half off membership dues for a year.

Joint Meeting with ASQ:

Please join us at Adelphia Restaurant in Deptford on Tuesday, October 11th, for an in-person section meeting featuring James August, Quality Assurance Manager for CCL Label, Inc in Robbinsville NJ.

Meeting Agenda:
6:00 – 6:30: Sign-in, Networking and social time
6:30 – 6:45: Announcements
6:45 – 7:30: Presentation
7:30: Dinner and networking/further discussion

The cost is $25 (cash or check only – ATM is available onsite). If you would like to attend so we can get an accurate attendee estimate for Adelphia, please email scornish@memberleader.asq.org

Jim August is a quality professional with over thirty years' experience in commercial, industrial, and military/aerospace manufacturing. Currently, Jim is Quality Assurance Manager for CCL Label (Robbinsville) where he is working to integrate ISO 9001, cGMPs, and Lean Manufacturing into a single business quality management system for five label plants in the US.

Always interested in Quality education, Mr. August has taught courses at Rutgers, Raritan Valley Community College, and Middlesex County College. Jim has been a workshop leader and trainer for ISO 9001 and ASQ CMQ/OE and CQE certification refresher courses.

PRESIDENT'S MESSAGE

We Want YOU!
Our chapter is starting the process of our annual elections and calling for nominations. Members can self-nominate, and YOU are encouraged to do so! You are encouraged to consider a Director-At-Large position (all positions are open). A Director-At-Large does not have specific duties but provides an opportunity to contribute as you feel comfortable or just provide a voice on chapter matters or member concerns. Busy schedules are the norm in todays world; but the time commitment as a Director-At-Large is not onerous. We currently meet monthly at a restaurant in Audubon, NJ to plan chapter activities and outreach; but there is a call-in option for board members that can not make it in-person. Hopefully this is an opportunity to gain some leadership or organizational experience.

Our board now has six members; this is on the low end of our long-time board sizes which have ranged as high as 14 members. Engineering has traditionally been a male profession but there are many more women in engineering and our chapter had been blessed to have a couple serve as board members; and chapter president. But we are currently do not have a woman on the board who might ensure we have considered all aspects of a members opportunities that a chapter can provide. We're all engineers – we're trying to serve engineers with learning, bench marking, and network opportunities. Everyone brings their own perspectives to the table, and I hope everyone considers this as an opportunity they would like to pursue. And when I say everyone; I really mean YOU! If interested or interested to learn more; contact me or any board member. Our contact information is listed in the newsletter. Let's get better together. I hope to hear from YOU!

The September kick-off social was a good time. A small but enthusiastic group got together at the Parx Casino for some good food, good drink, and good conversation. It was a great kick-off to the new program season. My thanks to Kevin Drevik and Paul Siebeneicher for making it happen! We have a couple of excellent programs coming up – this month will be a joint meeting with the ASQ at the Adelphia Restaurant in Deptford, NJ (Supply Chain) and a plant tour of Melitta Coffee in Cherry Hill, NJ (tentatively November 16th). Tours and joint-ASQ meetings have been popular; always check our newsletter for details.

Our Chapter has been recognized by the Institute as one of the best run chapters; being the ONLY one to achieve IISE's highest chapter award – Gold for 24 consecutive years. Help us make it 25! I would like to thank our current board members for agreeing to remain on our board. They have all been solid contributors to our 24 year and prior success. And I hope to see you at one of our upcoming events!
John McGowan

Chapter Progress Article

We Aim To Please

Our chapter exists to serve our membership and our board has always kept that focus. We'd like to increase membership participation and welcome any feedback. How do you think we can improve? Are virtual programs working for you? Do you have ideas for programs? Ideas for plan tours? Would your company sponsor a plant tour (we're giving membership incentives)! Any comment to improve our chapter would be welcomed. It's a busier world, our programs compete with a lot of things for your time – family things, work things, fun things, have to do things. We on the side of hoping that our planning adds value to your membership & that we're planning the right things. Please let a board member know (contact information in each newsletter).

All the Best!!!!!

Event Report

IISE held their September Networking Event to kick off the 2022 – 2023 event season. We held it at the Gastropub May Networking event at the Liberty Bell Gastropub in Bensalem PA. Topics of discussion included quality, sourcing of engineering work, and hiring. A good time was had by all.

Our November event, courtesy of Fred Rexon and Precision Automation, is a site tour of their new automation install at the Melitta Factory in Cherry Hill NJ

Automation Engineer- job post
Xyntek Incorporated, a CXV Global Company
Newtown, PA 18940

Overview:

As a Xyntek Automation Engineer fulfilling the role of a Logistics Automation Systems Field Engineer, you will be an integral member of a dedicated team of skilled field service, systems automation engineers & engineering technical leads collectively responsible for end-to-end design, pre-assembly, build, installation, configuration, testing and turnkey delivery of cutting-edge image-based package tracking solutions at many of the largest automated e-commerce fulfillment and distribution facilities around the country.

Responsibilities:
The candidate will be primarily responsible for the installation, commissioning and handover of automation systems and solutions to customers. The candidate will independently perform a full range of standard work and apply problem-solving skills in order to deal with most situations. This role has a high degree of customer interface, and is expected to provide a high level of customer service and satisfaction. Typical industry applications include:

- Parcel and pallet conveyors
- Sorters
- In-motion scales
- Dimensioners
- Label printer/applicators
- Scanners and sensors
- PLC controls software

Quote for Today: "Meditate often on the interconnectedness and mutual interdependence of all things in the universe. For in a sense, all things are mutually woven together and therefore have an affinity for each other – for one thing follows after another according to their tension of movement, their sympathetic stirrings, and the unity of all substance." Marcus Aurelius
