

VOLUME 61

May 2022

NUMBER 5

IISE-SJDVC132 Website: <http://paulsehnen.wix.com/iiesjdvc>

Theme: Networking Event

Date: Tue, May 17, 2022

6:30 PM: Networking

7:00 PM: Dinner & activities

9:00 PM: Closing

Location: 570 Mullica Hill Rd.
Glassboro NJ 08028
(856) 243-5464

Cost: Chapter will be providing food
and pay for the first round of
drinks.

RSVP: Kevin Drevik kdrevik@aol.com

Chapter members are invited to set up a site tour of their employer's facility for the chapter's membership, in exchange for half off membership dues for a year. The tour ideally should include at least one topic of interest to IISEs, examples automation, just in time, lean, logistics, etc. The brief proposal should include the name of the employer, the location of the facility, the approximate size of the facility, a sentence or two about the focus of the proposed tour, any date or time suggestions and/or restrictions for the tour, and contact information for a contact person who can arrange such tour.

May Events

Networking Event at Bonesaw Brewing Company

Date & Time: Tuesday May 17th, 6:30pm to 9:00PM EDT

Join your fellow chapter members as we ring out the close of the IISE event year and the opening up of the economy as the Covid pandemic wanes.

Bonesaw is a brewing company which offers excellent brews and outdoor dining (for the fresh air). They allow you to bring your own food (by NJ law, brewing companies cannot offer food, due to anticompetitive rules). The chapter will be providing food and drink coupons for your first round.

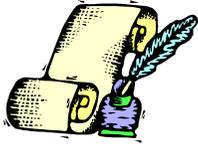

Come network with your peers and discuss how your company is doing, the latest sports news, or even the weather.

We are looking forward to seeing you!

RSVP: Kevin Drevik, kdrevik@aol.com (856) 630-2485

May Program	1	Chapter Officers	3
President's Message	2	Career Development	4
CAR Article	2	Treasurer's Report	5
Event News	3	Membership Report	5

Our May program is a lighthearted get-together that gives us the opportunity to foster a little fellowship. I hope you can attend the event; hopefully we get some great weather and have some great outside socializing with a microbrewery backdrop. This program ends our program year. Our chapter has traditional let summer be summer and resume our programs in September. But during these summer months; the board continues to meet to plan our upcoming year's possible programs. These past two years have been underscored with forced flexibility; and though we've had to adjust from normally in-person get togethers with virtual programs; a benefit has been joining other professional societies with greater scope and sometimes having multiple events in the month.

We appreciate the Boeing Corporation renewing its corporate membership and having 37 employees participating as chapter members. We've benefited with some terrific plant tours of the Boeing facility and they are long-time contributors to the successes of the IISE Annual Conference. Speaking of ... the National Conference will be held May 21-24, 2022 in Seattle. I've attended a couple of these conferences and they've always proved enlightening. I hope you have the opportunity to attend. And if you do, give us a little feedback.

I hope to see you at our May event; if not possible, I wish you a great summer and hope our paths meet in the upcoming program year.

Developing High Performing Quality 4.0 Teams to Achieve Organizational Excellence in Industry 4.0

Tuesday, May 10th, 2022, at 6:30 PM

Management today is faced with the unique situation where the teams necessary to meet the digital disruptions on Quality 4.0 will consist of multiple cultures and multiple generations of employees. The baby boomers, gen x, gen y and the millennials. Among this diverse generational group of professionals resides resources such as tacit knowledge and various levels of technical experience. This presentation will help leaders to recognize the individual skills of these cultural and generational groups and apply quality improvement tools to build high-performing internal teams to address the challenges of Industry 4.0.

By attending this presentation, you will get:

- Recognize the importance of the human element of Quality 4.0
- Develop high performing teams
- Apply effective team leadership to diverse teams, both technologically and culturally
- Improve team member performance

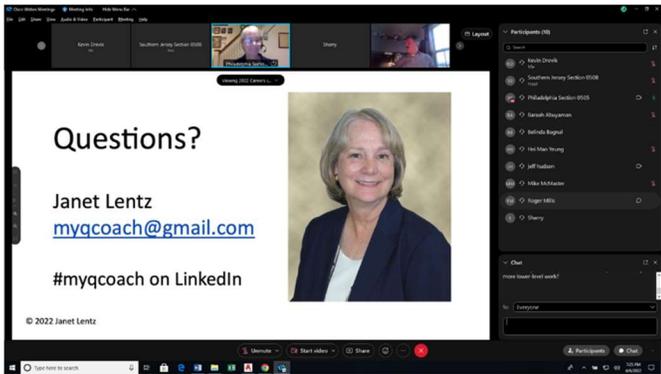

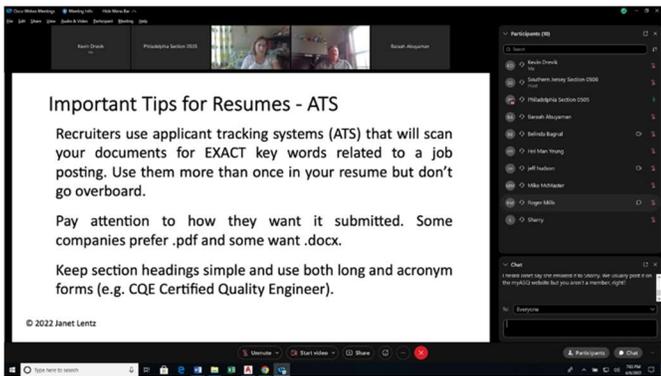

Meeting Instructions:

To register for this meeting, please contact Scott Cornish at scornish@memberleader.asq.org

Please contact Scott by Monday, May 9th at 6:00 PM ET. I do not have access to my ASQ WebEx account during the day May 9th and will not be able to register you in time to attend.

Event Report

IISE joined with ASQ to conduct a presentation on virtual networking, and how to network in the digital age. An excellent presentation by Janet Lentz

Industrial Engineer

United States Cold Storage

Camden, NJ 08103

\$72,000 - \$91,000 a year - Full-time

Job Description

The industrial engineer will assume the responsibility for developing engineered labor standards for the LMS (Labor Management System) This individual will be responsible for conducting work measurement studies in the warehouses, developing labor standards for employees, and implementing efficient distribution and order fulfillment process improvements. This individual must have a sound knowledge of the distribution process, and the use of technology-based solutions to increase productivity, quality, and service levels. Also, this position requires that the individual possesses the abilities to train all levels of employees on preferred methods, and to direct employees to the completion of tasks. The industrial engineer must have the ability to analyze operational processes, document prospective solutions, and present these solutions to upper management personnel.

Responsibilities:

- Prepare and update engineered labor standards to represent preferred methods established for warehouse positions
- Maintain map and work elements in labor management system.
- Monitor labor management system to ensure system performance and data integrity.
- Ensure appropriate levels of training compliance with proper work methods by employees to perform tasks.
- Work with CI manager to develop strategies for continuous improvement operations.
- Manage indirect time of warehouse employees at the facility.
- Ensure facility design and racking layouts support optimal operations, and make recommendations for improvement.
- Manage observation studies and perform observations on employees when in progressive discipline.
- Document and resolve quality issues and determine cause and effect items within distribution processes.

“You’ve got folks in healthcare and people in services and hospitality and manufacturing. It’s really great to sit back and see that even though somebody in manufacturing has a job very different than somebody who works in a hospital, they deal with the same issues. ... I just love learning about all these different perspectives, and I don’t get that same diversity at other conferences.”

Renee Thiesing, IISE’s newly elected senior vice president, industry, on a recent episode of Problem Solved: The IISE Podcast

Secure Your Spot in Seattle!

Why attend The IISE Annual Conference & Expo 2022, May 21-24?

1. Reconnect and reunite with your family of industrial & systems engineers – building and expanding your professional network.
2. Visit a dynamic city that is home to top engineering/technical firms – Amazon, Apple, Boeing, Lockheed-Martin, Tableau and more.
3. Tour 100s of educational sessions that will provide up-to-date best practices, tips and tricks that you can take back to your organization.
4. See how leading organizations have conquered the COVID-19 conundrum in your sector.
5. See who takes home the coveted IISE Cup!!!
